
ENVIRONMENTAL POLICY STATEMENT

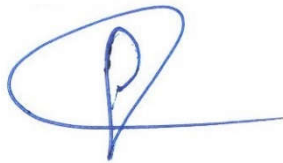

Munro Building Services Ltd recognises its moral and legal responsibilities to minimise its impact on the environment. In order to meet these responsibilities the Company is committed to establishing, maintaining and continually improving a documented, effective and efficient Environmental Management System, which forms part of the Business Management Systems of the Company and is designed to meet the requirements of our customers and current applicable legislation.

In order to meet its responsibilities the Company is committed to:

- Seeking opportunities to continually improve the operation of its Environmental Management System.
- Identifying and using materials and or processes that will overall reduce and prevent the risk of pollution.
- Minimise waste from all aspects of our business.
- Encourage, where possible, maximum use of recycling facilities.
- Promoting conservation of natural resources via efficient use of energy and minimisation of raw material usage.
- Purchasing, where possible, environmentally friendly materials and or services.
- Comply with relevant environmental laws and legislation and other requirements to which the organisation subscribes.
- Establishing procedure to support and implement the Environmental Management System.
- Reviewing and auditing these procedures and in general monitor potential environmental impact of the Company.
- Encouraging employees to play a full part in the implementation of our environmental policy. This, together with appropriate training (where applicable), will enable them to do so.
- Providing information to customers and other interested parties about our environmental policy.

Relevant objectives for the Environmental Management System are set to enable the effectiveness of the system to be measured. These objectives are established as part of the management review process and are reviewed quarterly.

Signed:

10th January 2018

Mr Steve Barry - Managing Director
