
ENVIRONMENTAL POLICY STATEMENT

Munro Building Services Ltd recognises its moral and legal responsibilities to minimise its impact on the environment. In order to meet these responsibilities the Company is committed to establishing, maintaining and continually improving a documented, effective and efficient Environmental Management System, which forms part of the Business Management Systems of the Company and is designed to meet the requirements of our customers and current applicable legislation.

In order to meet its responsibilities the Company is committed to:

- Maintaining an Environmental Management System that meets the requirements of ISO 14001:2015;
- Establishing Objectives & Targets;
- Continually improving the effectiveness of our management systems by monitoring the system and undertaking management reviews;
- Identifying and using materials and or processes that will protect the environment and prevent the risk of pollution;
- Minimise waste and encourage, where possible, maximum use of recycling facilities;
- Promoting the conservation of natural resources via efficient use of energy, minimisation of raw material usage and purchasing, where possible, environmentally friendly materials and or services;
- Comply with relevant environmental laws and legislation and other requirements to which the organisation subscribes;
- Providing information to customers and other interested parties about our environmental policy.

This policy document will be reviewed annually.
